Dear,

Planning Board

Our plan was to have the driveway of the home located on the Chestnut Street side of the house. Instead we decided to relocate the driveway back to its original location that were on the plans that the board approved. This driveway was the existing driveway that was used by 60 Chestnut Street before the division of lots. Now the driveway is located on the side street perpendicular to Chestnut Street having no effect on any street trees or stones.

In order for us to have the water connected and power brought underground from the street as per the plans provided, we are requesting to temporarily remove 3 feet of stone to make room for trenching and also removing one tree about 8inches in diameter. The stones will be put back in place once trenching is finished. We also will be planting about 60-70 arborvitae trees starting from the driveway and following up along the chestnut street side of the house.

Respectfully

Peter K. Qirici
