Subject: Request for Certificate of Compliance  
19 Ryan Road, Lynnfield MA 01940

Dear Emilie,

On behalf of our client, Deborah Croke, we are respectfully requesting a certificate of compliance for the work that was approved in the Order of Conditions for DEP File Number 209-0650 issued by the Lynnfield Conservation Commission on June 15, 2021.

As discussed during our phone conversation today, we have not performed a final As Built Survey of the grades over the constructed septic system, however, we have been provided with photographs of the site by the owner which show that the site is stable. Based on these photographs and the septic as built that we performed for the Board of Health, it appears that the work has been completed in substantial compliance with the conditions set forth in the order.

See attached photographs provided by the owner as well as the septic as built that we submitted to the Board of Health for approval.

If you have any questions or need additional information, please do not hesitate to contact us directly.

Very truly yours,

Peter M. Blaisdell, Jr., P.E., P.L.S.  
Project Manager
